Need to know for retailers

- Simplified version of the Seabee, retaining its rich bucket brigade analog chorus tone while adding three new modes (Classic, Flangee, Wobblee) and an easy-to-dial interface – no alternate controls or menu diving
- Each of the three modes features its own LFO style, delay times, and voicing, complemented by a Chorus/Vibee switch for a wide range of modulation textures
- CLASSIC for smooth vintage chorus, FLANGEE for flanger-style feedback, and WOBBLEE for tape-like wobble modulation
- Analog sound with digital control power: 16 presets, MIDI, stereo outputs, input level selection, and expression control
- Available in two colorways: pink and cream

Description

The Seabee Lite distills the oceanic chorus of the original Seabee Harmochorus into a simpler, and intuitive machine. It keeps the Beetronics tone and build quality, and adds three new chorus modes that bring fresh movement and character.

From the smooth CLASSIC triangle-wave chorus to the trippy FLANGEE with its flanger-style feedback, and the warped WOBBLEE with irregular, tape-like wobble LFO, each mode has its own unique personality. You can switch between Chorus and Vibee, sculpt the tone with high-pass and band-pass filters, and explore plenty of expressive tricks on the fly.

Beneath its simple interface lies a world of control, with presets, MIDI, expression, stereo options, and adjustable input levels that make it feel right at home with any instrument or setup.

The Seabee Lite carries the Harmochorus spirit forward with new sounds, modern features, and that unmistakable Beetronics feel.
