Description

Artist FR Standard & Special – Full Range. Feels Right.

Artist FR cabinets deliver professional FRFR (Full Range, Flat Response) sound in powerful and easy-to-use formats. Designed to capture the feel and response of a guitar amp, they are the ultimate partner for your modeller or floorboard. Using our custom designed FRFR speakers, they are perfect for practicing at home, stage monitors, or small gigs.

Blackstar Artist FR cabinets – Full-Range, Flat Response, Fully Featured
The Blackstar Artist FR cabinets are high-performance active full-range, flat-response cabinets, designed to have the aesthetics of a traditional guitar amplifier. The cabinets accurately amplify your modeller or profiler's true sound for live on stage monitoring to bring back that 'real amp' feel and provide the ability to use your modeller in a home environment - all in a compact and cost-effective format. Offering exceptional value, this range is engineered to meet the needs of both home players and gigging musicians.

Designed to Disrupt
Targeting a rapidly growing market segment, the Artist FR cabinets are positioned at a price point designed to challenge the competition. These cabinets focus on delivering outstanding tone and projection, making them ideal for home practice, rehearsals, and performances.

Amp-Like Aesthetic, Tailored Tone
With a classic amp-inspired design, the Artist FR cabinets look right at home on stage, in the studio, or in your living room. A versatile 3-band EQ and Presence control allows players to fine-tune the cabinet's response to match their setup and environment.

Redefining Full-Range Speaker Performance
At the heart of our design is a meticulously engineered full-range driver that delivers exceptional clarity, depth, and natural feel. Voiced to capture the full detail of high-end digital processors, it strikes the perfect balance between accuracy and musicality, ensuring every note resonates with warmth, definition, and articulation. This unique tuning preserves the real amp feel that players expect and desire.

Inside Information:
Amp models and IRs can vary a lot even on the same modeller, our powerful active EQ is voiced specifically for guitar frequencies so you can quickly and easily tweak your sound live or adjust it for different playing environments.

Our custom designed flat-response speaker includes a whizzer cone that supports the high frequencies in your tone to ensure you have perfect clarity.
