- KOSMOS® bass and treble enhancement
- Main stereo outputs with ¼“ unbalanced and balanced XLR connectors
- Precision 60 mm faders
- High quality master LED meter bridge
- Master mic mute
- Studio quality headphone output
- Equipped with Bluetooth® wireless connectivity, Bluetooth® 3.0 + EDR, A2DP
- On-board USB-A MP3 and WAV playback
- Stereo USB-B streaming audio in and out, 16-bit, up to 48 kHz sample rates
- Built-in Digital Effects with LCD Display
- 2 channels of Peavey's exclusive on-board Hi Z guitar input
- 4 assignable sub groups
- 4 XLR bus outputs
- Global 48V phantom power
- Dimensions (HxWxD): 5.9” (150 mm) x 31.3” (795 mm) x 22.8” (579 mm)
- Weight: 27.8 lbs (12.6 kg)

Description

Introducing the next level in world-class non-powered mixer performance. The all-new PV 22 mixing console includes Peavey's reference-quality mic preamps that spec in at an incredible 0.0007% THD, making the PV 22 mixer excellent for live or recording applications.

The PV 22 includes 16 channels of reference quality mic preamps, a stereo channel, media channel with Bluetooth® wireless input, high quality digital effects with LCD display, streaming USB out, MP3 playback via USB A input, Peavey's exclusive Kosmos® audio enhancement, 48V phantom power, dual selectable control room outputs, 6 channels of compression, two channels of on board selectable guitar preamp, 3-band EQ per channel with bypass, channel mute buttons, two aux sends, signal clip indicators, four sub groups and a stereo master LED meter bridge. This amazingly versatile mixer is at home both in the studio as well as live applications.

Modern features such as Bluetooth allow seamless connection to almost any "smart" device. The PV 22 can stream audio directly to a PC. MP3 playback is also available, just plug a flash drive with MP3 files on it into the USB A port and use the LCD to select and play back music. The Solo feature allows the user to listen to individual channels via headphone or control room outputs, and the EQ bypass allows the user to hear and compare the EQ'd signal to the original signal with the push of a button. 6 channels of compression keep signals with difficult levels under control, and Peavey's exclusive guitar shape adjusts the EQ and preamp specifically for guitar. Hi pass filters on every channel remove unwanted rumble and noise, and balanced AUX and Master outputs ensure a clean noise-free signal to your powered speakers or power amplifier.
