PEAVEY JOSHUA HOMME DECADE TOO CABINET

Extension Cabinet for Decade Too Amp

- Item: 66804
- Images | Translations | User Manual

Need to know for retailers

- Official extension cabinet to the Josh Homme Decade Too signature amp, expanding tone projection and stage presence.
- Chrome stand with tilt-swivel design for optimal monitoring and iconic visual appeal.
- Allows DECADE TOO combo to nest on top for better floor coupling without affecting the floating look.
- Enables bold feedback experimentation when used with the combo's PHASE switch.
- Features 8" proprietary speaker and one ¼" jack input.

Product Features

- Official extension cabinet for the Peavey Decade Too combo amp
- Proprietary 8" speaker voiced to match the Decade Too's tonal character
- Chrome rack-style stand with tilt-swivel design for directional clarity and monitoring
- Let's Decade Too combo nest securely on top for improved floor coupling and compact stacking
- Maintains floating cabinet aesthetic while enhancing stage projection
- Enables bold feedback experimentation when used with the combo's Phase switch
- Usable as standalone cab or stacked for a powerful wall-of-sound setup
- One ¼" jack input for simple connectivity
- Durable construction, lightweight and easy to transport
- Compact footprint – ideal for stage, studio, or home setups
- Perfect phase alignment with DECADE TOO combo for seamless sonic integration
- Optimized for bass, guitar, and experimental signal sources, just like Decade Too itself

Description

In a now-iconic YouTube video, Josh Homme, Grammy winner and frontman of Queens of the Stone Age and Eagles of Death Metal, revealed the secret behind his unique guitar and bass tone: the Peavey Decade™ combo amplifier. No longer a secret – Peavey's reimagined Decade™ Too brings Josh Homme's sound back to life and makes it an essential tool for guitarists looking to craft their own unique tone.

In a now-iconic YouTube video, Josh Homme, Grammy winner and frontman of Queens of the Stone Age and Eagles of Death Metal, revealed the secret behind his unique guitar and bass tone: the Peavey Decade™ combo amplifier. No longer a secret – Peavey's reimagined DECADE TOO brings Josh Homme's sound back to life and makes it an essential tool for guitarists looking to craft their own unique tone.

The Peavey DECADE TOO Extension Cabinet builds on this legacy, offering enhanced projection and sonic flexibility. Equipped with an 8" speaker and housed in a rugged chrome stand, the cabinet provides both a visual statement and real-world portability. Its tilt-swivel design allows for adjustable directional clarity and monitoring, whether you're in the studio or on stage.

The extension cabinet can be positioned separately to improve room dispersion or stacked neatly beneath the DECADE TOO combo for a commanding wall of sound. When nested directly beneath the combo, the amp sits securely on top of the rack, benefiting from superior floor coupling without compromising the "floating" aesthetic of the cabinet. This configuration doesn't just look iconic—it delivers practical sonic advantages.

When combined with the PHASE switch on the DECADE TOO amp, the extension cabinet also opens the door for bold feedback experimentation, giving players an expressive new dimension of tone shaping.

With its refined design and performance-minded features, the DECADE TOO Extension Cabinet is the perfect companion for those wanting to push their sound—and their stage presence—further.
