Need to know for retailers

- Secure pedalboard mounting solution for Radial compact devices – TrainTrack is designed to mount Radial DI boxes and utility devices such as the Highline, ProDI and Pro48 to the underside of a pedalboard, providing a clean, secure and professional installation without altering the original enclosure.
- Optimized for Pedaltrain pedalboards – TrainTrack is primarily designed for use with Pedaltrain pedalboards (Classic JR and larger) and is also compatible with select modular pedalboard systems, making it a practical accessory for common professional pedalboard formats.
- Maintains full access to I/O connections – The mounting design allows Radial devices to be positioned flush with the edge of the pedalboard, ensuring easy access to XLR and jack connectors while keeping the unit protected and out of the signal path.
- Complete hardware kit for straightforward installation – Each TrainTrack ships with the mounting bracket, all required fasteners, and a hex key, allowing the Radial device to be attached using existing screw points and installed quickly with standard tools.
- Clear size differentiation within the TrainTrack range – TrainTrack supports Radial compact enclosures, while larger-format Radial devices such as the JDI, J48 and Highline Stereo require the TrainTrack Plus (item 71077, simplifying product selection for retailers.

Product Feature List

- Secure pedalboard mounting bracket for Radial compact DI boxes and utility devices
- Designed for mounting Radial compact enclosures such as Highline, ProDI and Pro48
- Mounts securely to the underside of a pedalboard
- Creates a clean, professional pedalboard layout without modifying the Radial enclosure
- Keeps DI boxes protected from foot traffic, cable strain and accidental impact
- Allows devices to sit flush with the pedalboard edge
- Ensures easy access to XLR and jack connections
- Optimized for use with Pedaltrain pedalboards (Classic JR and larger)
- Also compatible with select modular pedalboard systems
- Attaches to existing screw points on the Radial device for secure installation
- Complete mounting hardware included for quick and straightforward setup
- Eliminates the need for Velcro or temporary mounting solutions
- Road-ready steel construction designed for touring and professional use
- Available in two sizes: TrainTrack for compact Radial enclosures and TrainTrack Plus for larger formats
- Designed and built to Radial's professional standards in Canada

Description

TrainTrack is a pedalboard mounting solution designed for Radial's compact devices such as the Highline, ProDI and Pro48. It provides a clean and secure method for integrating Radial DI boxes and utility pedals into professional pedalboard setups, keeping the equipment firmly in place while maintaining easy access to all connections and controls.
Designed primarily for use with Pedaltrain pedalboards, TrainTrack allows Radial devices to be mounted neatly under the pedalboard and positioned flush with the edge for convenient access to XLR and jack connectors. The result is a tidy, road-ready pedalboard layout that eliminates the need for Velcro or permanent pedal modification, making TrainTrack an ideal solution for touring musicians, system builders and professional stage rigs.
